## Profile

Backend-focused software engineer with hands-on experience developing RESTful APIs, relational database schemas, and web applications using Golang, Laravel, Express.js, PostgreSQL, and MySQL. Experienced in building and deploying education and public-sector systems using Docker and Linux-based VPS environments. Strong foundation in backend architecture, database design, testing, and maintainable application development.

## Education

### Institut Teknologi Sumatera (ITERA)

Bachelor's Degree in Informatics Engineering | GPA: 3.51/4.00

August 2022 – Expected August 2026

### SMA IT Fitrah Insani Bandar Lampung

Natural Sciences Major | Average Score: 90 | Best Academic Student

May 2019 – May 2022

## Career Highlights

- Backend Developer Intern.
- Fullstack Engineer Intern.
- Team Lead (8 Members).
- Lecturer Assistant.

## Experience

### HISSA Syariah Saham Indonesia

Fullstack Engineer Intern

June 2026 - Present

- Designed and implemented Laravel and PostgreSQL RESTful APIs that centralized authentication, course management, learning progress tracking, quizzes, and certificate verification within a single learning platform..
- Built a Vue.js learning platform that simplified user access through Google OAuth, protected application resources with Laravel Sanctum and role-based access control, and automated certificate generation after course completion..
- Designed a three-tier architecture and normalized PostgreSQL schema to separate presentation, business logic, and data-access responsibilities, and documented the APIs.

### Institut Teknologi Sumatera (ITERA)

Database Practicum Assistant

February 2026 - May 2026

- Guided 60+ students through eight hands-on PostgreSQL practicum sessions, helping them apply SQL queries, joins, constraints, normalization, and relational modeling in database exercises.
- Reviewed database assignments and exercises across eight practicum sessions, identifying SQL and schema-design issues and providing targeted recommendations for correction.
- Helped students diagnose and resolve SQL syntax, query logic, normalization, and relational modeling issues throughout a four-month academic term.

### Institut Teknologi Sumatera (ITERA)

Lecturer Assistant – Kapita Selekt

September 2025 - November 2025

- Supervised seven student teams from requirements analysis through final evaluation, helping each team translate project requirements into implementable system designs and deliverables.
- Reviewed database models, system designs, and implementation progress over three months, identifying design inconsistencies and development gaps before final evaluation.
- Provided technical feedback on application architecture, database design, and feature implementation to keep seven student projects aligned with academic and stakeholder requirements

### Public Relations Office of Institut Teknologi Sumatera (ITERA)

Backend Developer Intern

July 2025 - August 2025

- Developed Laravel backend modules for managing public information, institutional documents, and administrative content, replacing fragmented manual workflows with a centralized web-based system.
- Replaced a difficult-to-maintain legacy system with a Laravel and MySQL-based application featuring an administrator panel for easier content and data management.
- Improved maintainability by separating administrative workflows, application logic, and relational data structures into a more structured system.

### HMIF Mengabdi

- Delivered interactive science experiments that translated basic scientific concepts into practical and accessible learning activities for elementary school students.
- Adapted technical and educational material into clear explanations for non-technical audiences while supporting communication between organizers, participants, and local stakeholders.

Institut Teknologi Sumatera (ITERA)

Introduction to Computers and Software Course Assistant

February 2024 - May 2024

- Delivered hands-on C++ practicums that helped students apply fundamental programming concepts, control flow, functions, and basic problem-solving techniques.
- Helped students identify and resolve C++ compilation and logic errors, reinforcing systematic debugging and problem-solving practices during hands-on sessions.

Projects

Final Project | Institut Teknologi Sumatera

Web-Based Examination System - SMA IT Fitrah Insani Bandar Lampung

March 2026

- Built a Golang, React.js, and PostgreSQL-based examination system that supported concurrent exam sessions for 25 students and 5 teachers without downtime.
- Containerized and deployed the application using Docker on an Ubuntu VPS, while improving the usability score from 60 on the previous system to 71.88 on the newly developed platform.
- Implemented a more consistent question import workflow for managing 50+ questions per import while reducing data inconsistencies found in the previous system.
- Performed load testing in a staging environment to validate API performance, system stability, and concurrent exam execution before production deployment.

Green Education Information System for Banjar Agung Village, South Lampung

Team Lead & Backend Developer

September 2024 - December 2024

- Led an eight-member team by assigning tasks based on individual responsibilities, monitoring project progress, and coordinating development to ensure delivery within three months.
- Reviewed technical progress and aligned frontend, backend, and project requirements to reduce implementation gaps and keep the team on schedule.
- Developed RESTful APIs using Express.js and MySQL for environmental reporting, enabling village officials to identify illegal waste disposal locations and respond more effectively.

Skills

Programming Language: Go, PHP, JavaScript, SQL, C++, Python

Backend Development: Laravel, Express.js, RESTful API, GORM, Eloquent ORM

Frontend Development: Frontend: Vue.js, React.js

Database: PostgreSQL, MySQL, relational modeling, normalization, indexing, transactions

API & Documentation: API Design, API Documentation, Request and Response Contract Design, Postman

DevOps & Tools : Docker, Docker Compose, Linux, Git, GitHub, VPS deployment, Postman

Engineering Practices: System Design, Modular Architecture, Repository Pattern, Database Migration, Debugging, Unit Testing, Code Review

Languages

Indonesian: Native

English: ITERA English Proficiency Test Score 540 (Intermediate working proficiency)
