Profile

Software engineer specializing in RESTful API development, relational database design, and web-based application development, with strong expertise in backend architecture and scalable system design. Hands-on experience building reliable and maintainable applications using Golang, Laravel, Express.js, and PostgreSQL. Experienced in delivering backend solutions for educational and public-sector systems while collaborating with cross-functional teams throughout the full development lifecycle, from requirements analysis and system design to implementation, deployment, and optimization.

Education

Institut Teknologi Sumatera

Bachelor's Degree in Informatics Engineering | GPA: 3.51/4.00

August 2022 – Present

SMA IT Fitrah Insani Bandar Lampung

Natural Sciences Major | Average Score: 90 | Best Academic Student

May 2019 – May 2022

Career Highlights

- Backend Developer Intern.
- Fullstack Engineer Intern.
- Team Lead (8 Members).
- Laravel, Node Js, & Golang Developer.
- Lecturer Assistant.

Experience

HISSA Syariah Saham Indonesia

Fullstack Engineer Intern

June 2026

- Designed and implemented RESTful APIs for authentication, course and lesson management, learning progress tracking, quizzes, and certificate verification using Laravel and PostgreSQL.
- Built a Vue.js-based learning platform with Google OAuth, Laravel Sanctum session authentication, role-based access control, guided learning, and automated certificate generation.
- Designed the three-tier system architecture, normalized database schema, ERD, and API documentation, then deployed the application using Docker on a VPS environment.

Institut Teknologi Sumatera

Database Practicum Assistant

February 2026-May 2026

- Guided 60+ students across 8 practicum sessions covering PostgreSQL, SQL queries, normalization, joins, constraints, and relational modeling.
- Reviewed 8+ assignments or database exercises and provided targeted feedback on query correctness and schema design
- Helped students troubleshoot SQL and relational modeling issues throughout a four-month academic term.

Institut Teknologi Sumatera

Lecturer Assistant – Kapita Selekt

September 2025 - November 2025

- Supervised 7 student teams/projects through requirements analysis, system design, implementation, and final evaluation.
- Reviewed database models, system designs, and development progress across a three-month project period..
- Provided technical feedback to align project deliverables with academic and stakeholder requirements.

Public Relations Office of Institut Teknologi Sumatera

Backend Developer Intern

July 2025 - August 2025

- Developed Laravel backend modules for the ITERA PPID website, supporting public information management workflows.
- Designed relational MySQL database structures based on application requirements and entity relationships.
- Translated operational requirements into maintainable backend functionality and data models.

HMIF Mengabdi

Education Mentor & Public Relations Staff

November 2024

- Provided science education to elementary school students through simple and interactive experiments.
- Delivered learning materials to non-technical audiences and supported public communication activities.

Institut Teknologi Sumatera

- Delivered C++ programming practicums covering fundamental programming and problem-solving concepts.
- Assisted students in debugging compilation and logic errors during hands-on sessions.

Projects

Final Project | Institut Teknologi Sumatera

Web-Based Examination System - SMA IT Fitrah Insani Bandar Lampung

March 2026

- Built a Golang, React.js, and PostgreSQL-based examination system that supported concurrent exam sessions for 25 students and 5 teachers without downtime.
- Containerized and deployed the application using Docker on an Ubuntu VPS, while improving the usability score from 60 on the previous system to 71.88 on the newly developed platform.
- Implemented a more consistent question import workflow for managing 50+ questions per import while reducing data inconsistencies found in the previous system.
- Performed load testing in a staging environment to validate API performance, system stability, and concurrent exam execution before production deployment.

ITERA PPID System | Public Relations Office of Institut Teknologi Sumatera

Website-Based ITERA PPID System - Public Relations Office of Institut Teknologi Sumatera

July 2025 - August 2025

- Developed a web-based public information system that enabled ITERA PPID to publish campus information, policies, and public documents through a centralized platform
- Replaced a difficult-to-maintain legacy system with a Laravel and MySQL-based application featuring an administrator panel for easier content and data management.
- Improved maintainability by separating administrative workflows, application logic, and relational data structures into a more structured system.

Green Education Information System for Banjar Agung Village, South Lampung

Team Lead & Backend Developer

September 2024 - December 2024

- Led an eight-member team by assigning tasks based on individual responsibilities, monitoring project progress, and coordinating development to ensure delivery within three months.
- Reviewed technical progress and aligned frontend, backend, and project requirements to reduce implementation gaps and keep the team on schedule.
- Developed RESTful APIs using Express.js and MySQL for environmental reporting, enabling village officials to identify illegal waste disposal locations and respond more effectively.

Skills

- Programming & Frameworks:** Golang, PHP, JavaScript, C++, SQL
- Frameworks & Libraries:** Laravel, Express.js, Vue.js, React.js, GORM, Eloquent ORM
- Backend Development:** RESTful API Development, MVC Architecture, Three-Tier Architecture, Authentication, Google OAuth, Session-Based Authentication, Role-Based Access Control, API Integration
- Database:** PostgreSQL, MySQL, Relational Database Design, Database Normalization, Data Modeling, ERD, Transactions, Constraints, Indexing
- API & Documentation:** API Design, API Documentation, Request and Response Contract Design, Postman
- Tools & Deployment:** Git, GitHub, Docker, Docker Compose, Linux, VPS Deployment
- Engineering Practices:** System Design, Modular Architecture, Repository Pattern, Database Migration, Debugging, Unit Testing, Code Review

Languages

- Indonesian:** Native
- English:** ITERA English Proficiency Test Score 54
