Profile

Fresh Graduate Software Engineer with internship and project experience building REST APIs, backend services, and data-processing systems using Go, Laravel, and PostgreSQL. Experienced in relational database design, concurrent processing, automated testing, Docker, and Linux deployment.

Education

Institut Teknologi Sumatera (ITERA)

Bachelor of Informatics Engineering (Computer Science) | GPA: 3.60/4.00

August 2022 – August 2026

Experience

PT HISSA Syariah Saham Indonesia

Fullstack Engineer Intern

June 2026 – August 2026

- Designed Laravel REST APIs and Vue.js/TypeScript interfaces for learning management, stock analytics, and financial-data processing systems.
- Developed an XBRL/iXBRL pipeline covering filing discovery, artifact download, parsing, normalization, validation, and publishing.
- Integrated Python/Arelle with Laravel Queue and Redis to asynchronously process financial facts, contexts, units, dimensions, and filing metadata.
- Implemented canonical data models, versioned mapping rules, data-quality checks, source lineage, retry/reprocessing workflows, and operational dashboards using PostgreSQL/MySQL.

Institut Teknologi Sumatera (ITERA)

Database Practicum Assistant

February 2026 - May 2026

- Mentored 60+ students across eight PostgreSQL practicum sessions covering SQL, joins, constraints, normalization, and relational modeling.
- Reviewed assignments and diagnosed SQL, query-logic, and schema-design issues

Public Relations Office of Institut Teknologi Sumatera (ITERA)

Backend Developer Intern

July 2025 - August 2025

- Developed Laravel and MySQL backend modules for public-information, institutional-document, and administrative-content management.
- Consolidated fragmented legacy workflows into a centralized web application and administrator panel, improving maintainability and data management

Projects

HISSA Financial Data Engine | PT HISSA Syariah Saham Indonesia

Fullstack Engineer

July 2026

- Built an XBRL/iXBRL financial-data pipeline using Laravel, Python/Arelle, Redis, and SQL, covering filing discovery, parsing, normalization, validation, and publishing.
- Implemented asynchronous stage-based processing with Laravel Queue, retry/reprocess mechanisms, idempotency controls, source lineage, and data-quality gates.

HISSA Stock Analysis Dashboard | PT HISSA Syariah Saham Indonesia

Fullstack Engineer

July 2026

- Built Laravel/PostgreSQL analytics APIs with filtering, aggregation, ranking, and pagination for stock-market data visualization.
- Implemented Vue 3 dashboards with ECharts, Vue Query, validation, performance logging, and automated testing

HISSA Academy Learning Platform | PT HISSA Syariah Saham Indonesia

Fullstack Engineer

June 2026 – July 2026

- Developed Laravel/PostgreSQL backend modules and Vue/TypeScript interfaces for courses, quizzes, learning progress, and certificates.
- Designed consistent REST API contracts with Laravel Sanctum, validation, pagination metadata, and UUID-based public identifiers.

Final Project - Web-Based Examination System | Institut Teknologi Sumatera

Fullstack Engineer

December 2025 - March 2026

- Built an end-to-end web examination system using Go, React.js, TypeScript, and PostgreSQL, including RESTful APIs, relational database design, frontend integration, testing, and deployment.
- Implemented concurrent background processing using goroutines, context, WaitGroup, and graceful shutdown for question-import and grading workloads.
- Containerized and deployed the system with Docker on an Ubuntu VPS, achieved a 0% request error rate during load testing, and improved the System Usability Scale (SUS) score from 56 to 71.88.

Green Education Information System for Banjar Agung Village, South Lampung

Team Lead & Backend Developer

September 2024 - December 2024

- Led an eight-member development team, coordinating frontend, backend, and project delivery within three months.
- Developed Express.js and MySQL REST APIs for environmental reporting and illegal-waste-location management.

Skills

Backend: Go, PHP, Laravel, Node.js/Express.js, REST APIs, GORM

Frontend: React.js, Vue.js, TypeScript, JavaScript

Database: PostgreSQL, MySQL, Redis
Testing: Unit Testing, API Testing, Load Testing
DevOps & Tools: Docker, Linux, Git, GitHub

Languages

English: ITERA English Proficiency Test Score 540 (Intermediate working proficiency)
